

LOCAL MAN IS FATALLY HURT ON WEDNESDAY

WALTER POYNTER DIES
AFTER ACCIDENT ON
COUNTY ROAD

Walter Poynter, 60, was fatally injured in an automobile accident at 4:05 p.m. Wednesday on the county road running north and south just east of the Greencastle airport.

Poynter was taken to the Putnam county hospital in an unconscious condition where he died Thursday noon.

State Trooper Grover Vaughn reported that Mr. Poynter, who resided at 210 West Poplar street, was going south when his 1953 Buick went out of control and ran off the road on the east side. The car spun around twice in Bob Cash's clover field and then went back across the road. It almost ran into a fence on the west side before cutting back across to the east where the left front part of the auto crashed against a tree.

Poynter was thrown out of the car by the force of the impact. Trooper Vaughn said the distance was over 500 feet from where the machine first left the road to where it hit the tree.

Mr. Poynter was a well known farmer, his farm being located on the Airport road.

Survivors include the wife, five daughters, Mrs. Helen Fine, Mrs. Fern Proctor, Mrs. Wilma Proctor, all of Greencastle R. R., Mrs. Betty Zeiner, Mrs. Ruth Stanger, both of Fillmore; one son, Walter Lee Poynter, at home; twelve grandchildren and other relatives.

Funeral arrangements will be announced later by the Rector Funeral Home.

Tornado, Storm Claim 3 Lives

By United Press

A tornado and storm killed three persons in the Midwest and a warning of possibly more twisters in Iowa was issued today.

The Chicago Weather Bureau said there was a possibility of an isolated tornado in the area along and 30 miles southeast of a line from Des Moines to Waterloo.

Meanwhile a blanket of hot, sticky air settled over the nation's southeast, the Southern and Central Plains and most of the Great Lakes region.

The tornado struck farm lands four miles south of Rockwell City, Iowa, shortly before midnight, killing 23-year-old William Nicholson.

Two 11-year-old boys, Dennis Leland and Donald Feld, were killed by lightning as a violent rain storm swept Milwaukee, Wis.

Heavy rains also pounded the Iowa cities of Webster City, Ames and Jewell early today, flooding a railroad bridge near Jewell.

Seek Release Of Yanks In China

GENEVA, June 10 (UP)—United States and Red Chinese officials met today for the second time to negotiate for the release of Americans detained in Peiping.

At least 59 American civilians and 29 servicemen are being held against their will by the Chinese Reds, according to U. S. information.

Negotiations were resumed today after Washington carefully had considered the result of the first, 30-minute conversation.

The U. S. State Department approved the meeting with the Chinese after deciding there was no implied recognition of the Peiping regime in discussing release of the captives.

It was believed that an arrangement would be made to release Americans in return for exit permits being granted to Chinese students in the United States seeking to return to their homeland. American officials estimate the number of such students at 120.

Reds Take Two More Delta Posts

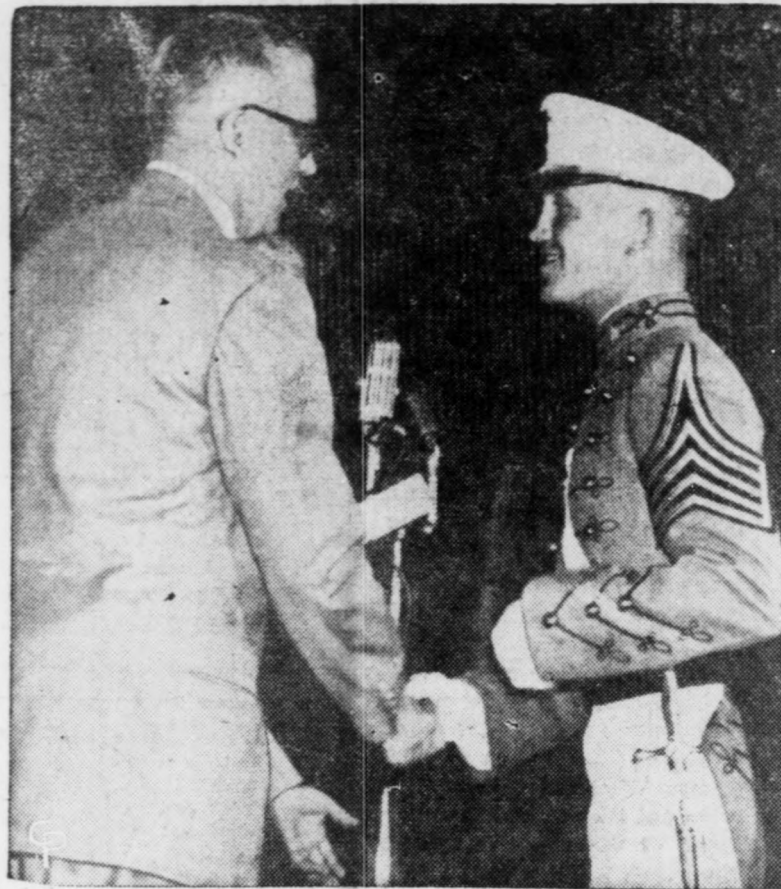

HANOI, Indochina, June 10 (UP)—Communist troops captured two more posts in the south Red River Delta, wiping out one of the garrisons, in fierce amphibious battles through flooded rice paddies, the French High Command announced today.

Rebel troops took the post of Hai Yen, at the confluence of the Red River and Bamboo Canal 30 miles southeast of Hanoi, and the garrison at Lat Khien, 35 miles south of the northern Indochina capital.

The high command said the entire garrison at Lat Khien had been killed or captured by the rebels.

Loss of the two posts was announced as the high command reported the advance of four divisions which conquered Dien Bien Phu to a point about 40 miles west of Hanoi.

STEVENS SLAPS AT McCARTHY

ARMY SECRETARY Robert Stevens congratulates cadet Marion Meador of Atlanta, honor man of the West Point graduating class, as he awards diplomas to 634 cadets. In a fighting speech to the cadets, Stevens told them they never will be subjected to "unwarranted attack or abuse" while he is running the Army. The statement was an indirect slam at Senator Joseph McCarthy who, according to Stevens, abused a general during a hearing last winter.

No Immediate Trips To Moon Are In Prospect, Dr. Edington Tells Rotary

Dr. W. E. Edington, in his talk before the Greencastle Rotary Club at the Student Memorial Union on Wednesday, discouraged the idea that trips to the moon are an immediate prospect. This and other interesting facts on the solar system were brought out in his commentary on astronomy, on which subject the speaker is a recognized authority. Dr. Edington was introduced by Edward Smythe, who presided.

Astronomy, the oldest and one of the most fascinating of sciences, was given a new meaning to the audience in the manner in which Dr. Edington handled his discussion. The matter of space, involving incomprehensible distances, was most impressive. In this respect, the speaker mentioned that the planet Venus, about the same size of the Earth, is 160 million miles from the Earth, and Saturn, with its three great rings, is 900 million miles away. In giving his audience an idea of the distance of the nearest star, Dr. Edington said that on a scale with the sun and Earth one inch apart, the nearest star would be placed four miles away. "The great distances involved in the universe makes space travel pretty far fetched," said the speaker.

In commenting on the moon, Dr. Edington said that there is little air on this planet so that all conversation would have to be conducted by radio. He commented further that the rear of the moon is pitch dark and that only the side facing the earth has any light.

Dr. Edington extended an invitation to the general public to visit the observatory on Thursday and Friday evenings of this week. Two groups will be conducted each night, one at 8:00 p. m. and one at 9:00 p. m.

Among the visiting Rotarians were a number of ministers attending the Methodist conference at DePauw, which included A. V. Coble, South Bend; E. B. Martin, Hammond; E. R. Balsley, LaPorte; C. M. Smith, Valparaiso; W. E. Clark, South Bend; E. E. Franklin, Michigan City, and S. E. Corinthe, Gary. Also there were R. O. McClamrock, Crawfordsville; W. W. Whitehead, Lebanon, and Sam Stickle, Staten Island, N. Y., who was the guest of Howard Williams.

Ike Will Ask Public Support

WASHINGTON, June 10 (UP)—President Eisenhower will call for public support for his legislative program tonight in his first major policy speech in nearly two months.

The White House refused to give any details. But there was speculation that the chief executive might also discuss the explosive Indochina crisis and possible U. C. involvement.

Observers noted it is unusual for the President to make an important radio-television address on such short public notice—less than 48 hours. They also pointed out that it comes hard on the heels of Wednesday's meeting of the National Security Council.

Mr. Eisenhower will speak before a meeting of the District of Columbia Citizens For Eisenhower Committee—a 1952 campaign organization—between 9 and 10 p. m. EDT. Most major networks planned some coverage.

The President is described as extremely anxious to get the bulk of his ambitious legislative program through Congress before it adjourns, possibly by July 31. He told his news conference last Wednesday that he would take every opportunity to discuss it with members of Congress and the public.

Vice President Richard M. Nixon and House Speaker Joseph W. Martin, Jr., Mass., are among the other guests scheduled to speak on tonight's program.

VIENNA, Austria June 10 (UP)—Russian troops started halting and checking vehicular traffic on roads at the borders of their occupation zone today for first time since last June.

OMAHA, Neb., June 10 (UP)—Secretary of State John Foster Dulles says any "sacrifice" the United States makes to act in Indochina must be made "worthwhile" by a foundation of moral principle.

"Whatever we do in relation to Indochina," or other international problems, should be based on moral principles which make it "worthwhile to make the sacrifice," he said Wednesday.

"It is terribly important to stick to principles," he said. "They made America strong."

Dulles touched only briefly on the Indochina crisis in his chamber of commerce speech. He called the Indochina situation "very delicate" and added "I don't want to trust myself in an unprepared, off the cuff statement, an inadvertent or awkwardly expressed word could cause repercussions."

PITTSBURGH, June 10 (UP)—U. S. Steel Corp., largest producer in the industry, presents counter-proposals to demands of the CIO United Steelworkers today at the opening session of the second round of 1954 contract negotiations.

The offer to be handed the union by "Big Steel" was reported slight in comparison to the size of the "package" program proposed by the USW at the three-day initial session of wage conference.

Negotiations were recessed May 20 to allow the company time to study the demands. U. S. Steel's agreements with the union usually set the pattern for the basic steel industry.

WASHINGTON, June 10 (UP)—The Agriculture Department has estimated that cigarette sales dropped 4½ percent this year. It said it does not know if fears of lung cancer had anything to do with the decline.

The department estimated Americans will smoke at total of 416 billion cigarettes in the fiscal year that ends the last of this month.

It said "it may be" that smokers who switch to king size brands, which contain about 17 per cent more tobacco than regular sizes, smoke slightly fewer cigarettes daily.

WASHINGTON, June 10 (UP)—Congressional experts today cautiously forecast happier relations between this country's five wrangling atomic bosses.

They "hoped" this would come about with congressional approval of compromise language.

DR. GARRISON GIVES ADDRESS AT CONFERENCE

CLEAR COMMUNITY THINKING IS DIFFICULT, PASTORS, LAYMEN TOLD

"Clear community thinking is made difficult in Indiana by the activities of some professional patriots who do not believe that the people can think for themselves," Dr. Edwin R. Garrison, administrative assistant to Bishop Richard C. Raines, declared Wednesday at opening sessions of the Northwest Indiana Methodist Conference.

The Conference, which is meeting in Greencastle on the DePauw University campus June 8-13, is being attended by 300 ministers and lay delegates to conduct annual church business.

Dr. Garrison amplified remarks made at the North Indiana Conference two weeks ago which met in Kokomo. He spoke again of "groups which have already demonstrated their power to limit the right of public assembly in the tax supported World War Memorial and they boast that they will continue to do so."

"We must not be paralyzed by fear or bind ourselves with hate," he said. "The church must proclaim that our problem is a problem of faith—faith in God as the Father of mankind, and hence faith in ourselves, faith in our ability to think together, to reason things out, to come to conclusions and to act upon those conclusions. This faith we ought to proclaim—and proclaim it we will—patrioters or no!"

The conference applauded Dr. Garrison's statement and afterward placed it in the report of the Committee on the State of the Church by a unanimous vote.

The Conference, through the report of the Committee of the State of the Church, affirmed "its faith in the public school system, its teachers, and its administration. It is not a 'Godless system,' the report declared. The conference called on our schools 'for greater co-operation with the churches in the division of the child's time.'"

In speaking to the controversial issue on the role of the church in community and national affairs, the reported stated, "Nothing can be conceived of as being foreign to, or exempt from the demands of, the ideal embodied in the person of Jesus. The scope of the church's concern runs through the entire range of human experience, from matters of personal conduct to the implications of H-bombs for the survival of the human family."

The conference heard the Rev. Ronald V. Spivey, pastor of the oldest Methodist church in the world, which is located in London, England, at early morning sessions Wednesday and at evening sessions Wednesday night.

Today the conference will consider reports from the Board of Education and the Woman's Society of Christian Service. The lay member's session will be held this afternoon with a banquet this evening at 5:30 in the Union Building. Kris Jensen, a North Korean prisoner for three years, will address the group.

The Woman's Society in the afternoon will feature Miss Jane Hahne, principal of a Girls' School in Lima, Peru.

MARTINSVILLE, Ind., June
10.—(UP)—William Leonard
Haley, 22, Indianapolis, faced life
imprisonment today in the fatal
stabbing of an Indianapolis man
during a fight.

A Morgan county jury late
Wednesday deliberated about an

Haley, arrested in Detroit last
December, was brought to trial
last Monday. Testimony dur-
ing the trial, Haley admitted
fighting with Irons and the vic-

car. But he said he had no recol-
lection of stabbing Irons.

A Little Of THIS AND THAT

By JIM ZEIS

A reader writes and asks why can't some of the parking meter money be used to erect a stop and go sign at Vine and Washington streets. We understand that this expense would be up to the state due to the fact that Washington street is a part of the State Road 43 route through Greencastle. Incidentally, the State Highway Department has said in the past that there is not enough north and south traffic at this intersection to warrant signals.

We noticed a number of out-of-state license plates on cars in the downtown section Wednesday afternoon. These included Arizona, Texas, California, Michigan, Ohio, Illinois, Kentucky, Tennessee, Iowa, Nebraska, Connecticut, New York, Oklahoma, Georgia, New Jersey, Colorado, Idaho, Wisconsin, Minnesota, Louisiana and Florida.

We certainly want to be included among those who believe that Greencastle has a bright future in store.

Glad to see that the street department repaired the alley back of the Production Credit building.

It is needless to say that the Bainbridge Volunteer Fire Department is planning on everyone having a good time during the annual four-day street fair and fish fry next week. We have Vic Walters' word for it!

Here are some facts about our beautiful Putnam county court house that perhaps you do not know or may have forgotten:

The building was contracted for on July 29, 1903.

The cornerstone is on the northeast corner of the structure and was laid by the Masonic fraternity, October 29, 1903.

J. W. Gaddis, of Vincennes, was the architect.

Caldwell & Drake, of Columbus, were the contractors.

The construction board was composed of T. D. Brookshire, V. B. McCamack, S. H. Judy, county commissioners; Geo. W. Hanna, Jas. McD. Hays and J. L. Randel, appointed members.

The dedication took place on July 29, 1905.

The cost was \$144,997.39 for the building; \$17,385.69 for heat and sewer, and \$13,366.60 for furnishings.

At the time of the dedication, C. C. Hurst was auditor; J. M. James, attorney; J. T. Edwards, treasurer and H. L. Bovell, superintendent.

This happens to be our birthday and also Harold Reckley's. We're both the same age but that we're not telling, are we, Harold?

This kind of weather should make Indiana corn "knee high by the Fourth of July."

Premier Asks Confidence Vote

PARIS, June 10.—(UP)—Premier Joseph Laniel called today for a vote of confidence that gave the National Assembly a chance to topple his government during a crucial phase of the Geneva conference.

The vote on the government's Indochina war policy was scheduled for Saturday morning's session.

Political observers said there was a strong likelihood Laniel's 11-month-old government will fail to survive. A vote of no confidence would plunge France into a government crisis again and leave it without an authoritative voice at the Geneva conference,

where its future in Indochina is being debated.

Out of the crisis could come a government prepared to make peace.

U. S. Backed By Great Britain

GENEVA, June 10.—(UP)—Britain stood solidly behind the United States today in a Geneva conference struggle against Communist attempts to dismember two democratic Indochina states.

Western sources said British Foreign Secretary Anthony Eden and U. S. Undersecretary of State Walter Bedell Smith found themselves in complete agreement on Indochina at a private

meeting. Attempts by Soviet Russia and Communist China to partition Laos and Cambodia, which with Viet Nam make up the Associated States of Indochina, dropped the cease-fire discussions to their lowest point in 46 days.

Soviet Foreign Minister Vyacheslav M. Molotov dashed the West's hopes for an early end to the seven-year war Tuesday when he listed the Communists' unacceptable conditions for peace.

Red Chinese Premier-Foreign Minister Chou En-Lai parroted Molotov's tirade Wednesday at another disappointing session and plunged peace efforts to a new low by accusing the French government of designing to prolong the war with American aid.

LOOKING... AT LIFE

By Erich Brandeis

Too many students consider a college education a pleasant journey over a good road already built, rather than a road-building job.

That is what Dr. F. J. Hooven, lecturer in engineering at Antioch College, Yellow Springs, Ohio, thinks about modern education, and particularly about engineering education.

Business and the professions need self-starters, he writes, and self-starting requires NERVE.

"The first requirement in order to think about creative develop-

ment, is to have the nerve to start," he writes in the news bulletin of the college. "Yet I know more people who lack the willingness to start than those who are willing but not able."

"No matter how limited the ability, there is some achievement if there is some performance; but there is no achievement as a consequence of this sort of timidity, many engineers find themselves the servants of some bold spirit who may have started out as a salesman, a drill-press operator, or an English literature major."

What Dr. Hooven says about engineers applies to every phase of life.

Read the stories of successful men. Think of the people you

know who have gotten ahead.

Often they are no better equipped than you are or the fellow next door. Yet, they have had the nerve to start and that same nerve made them go ahead and ahead.

To succeed one first has to have the WILL to succeed. Too many college graduates think that their education ends with their diploma.

"I would rather know what a man has learned during the past month," says Dr. Hooven, "than how many degrees he has. Educators will agree that the proper function of formal training is to start a person on the path of learning rather than to bring him

to the end of it."

The history of successful men is filled with stories of individuals who have never gone to college at all, yet became eminently successful.

It would be foolish to repeat here the story of Abraham Lincoln who gained most of his "book knowledge" from reading and studying far into the night.

Henry Ford never went to college, never even had an average education. He did not believe very much in books. But when he had an idea, he had the nerve to start, and to develop his idea until it had made him millions of dollars.

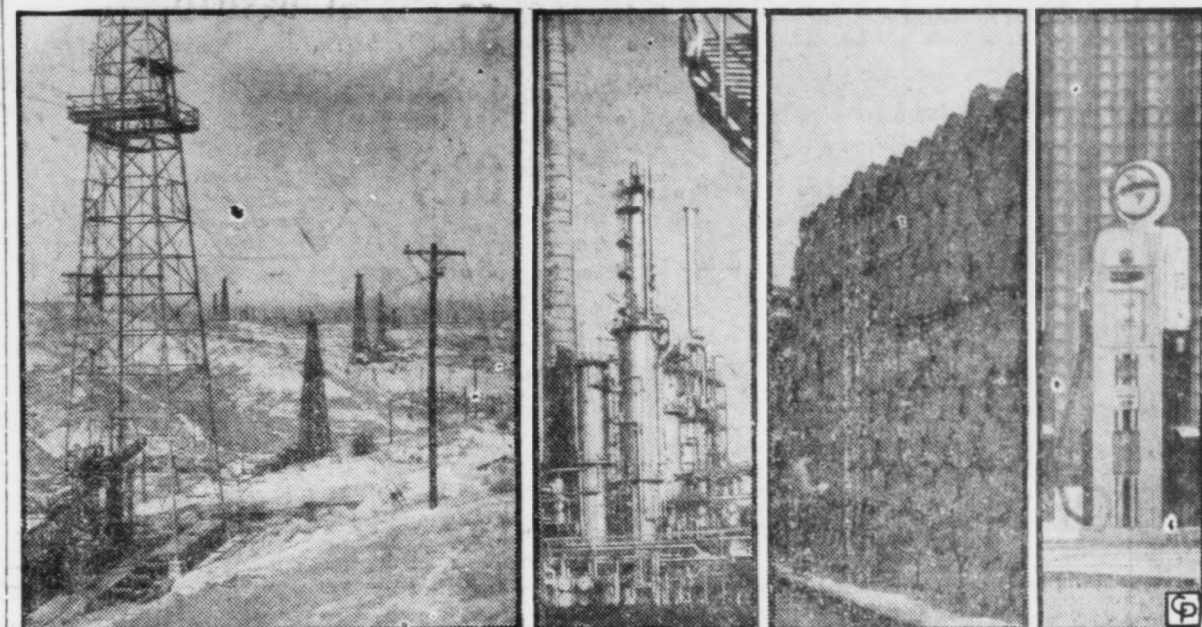

There are very few men and women in this country who, once upon a time, did not have an idea which, if developed and carried to conclusion, would have made them a good bit of money.

But the thing most of these people lacked was the confidence in themselves and the persistence to get started and to go on with their idea.

Books—and particularly textbooks—are a necessary adjunct to education. But you must remember that books are merely records of things ALREADY known. Progress starts where the books leave off.

Books are yesterday; applied ideas are TOMORROW.

POLICE COOPERATE

MISHAWAKA, Ind., June 10.—City, county and state police in four upstate counties and Chicago city police late Wednesday

pooled forces to rush a Mishawaka "blue baby" to Children's Memorial Hospital, Chicago, in two hours.

The infant, Gregory Wayne Bartlett, son of the Jack Bartletts, was born Monday. The attending physician said the condition was known at birth but the child was held at St. Joseph's Hospital for further diagnosis and completion of arrangements for hospitalization to the Chicago hospital.

"BIGGEST" VIOLATOR

INDIANAPOLIS, June 10.—(UP)—Marion County jail today housed what is probably the "biggest" law violator in its history.

The prisoner, Roland Dulin, 25, Indianapolis, weighed in at 625 pounds as he began a seven-month sentence for an unlicensed liquor sale. Jail officials figured they might trim his figure a bit before he was released.

"Gosh, we'll have to increase our grocery order tomorrow," Capt. Ed Benick commented when Dulin lumbered into the lockup. "And what'll we do for overalls." Benick asked. "There isn't a pair in here to fit this guy's big toe."

Jury Starts New St. Louis Probe

ST. LOUIS, June 10.—(UP)—A federal grand jury, which has made sensational charges of labor racketeering in the St. Louis area, launched into new investigations today.

It did so with U. S. District Judge George H. Moore's warning that its record so far "is not much more than a beginning."

The investigation reached a mile post Tuesday when the grand jury issued an interim report charging widespread corruption.

It charged that a few men hold

a "great concentration of power" in unions here, that inadequate control and loose accounting of union funds is commonplace, that business agents practice discrimination in sending good workers to certain contractors and poor ones to others, and that some unions have tried to take the law into their hands through strike violence.

The jury's report singled out Harold J. Gibbons, secretary-treasurer of the AFL Teamsters Union, Local 688, as one of the men who has obtained a great concentration of power.

Vast Hunt For Missing Bomber

IWAKUNI, Japan, June 10.—(UP)—Planes and ships ranged over the East China Sea today in a vast hunt for a U. S. Navy patrol-bomber missing since Wednesday with 17 men aboard.

The search was spurred by the admittedly slim hope that the twin-engined amphibious patrol bomber could still be afloat if it

landed undamaged in the sea south of Japan. The plane "dropped out of sight" while on a routine flight to Hong Kong from the Iwakuni

Air Base. It made radio contact with the base an hour and a half after a dawn takeoff as it left the Japanese coastline near Nagasaki.

Three hours later, a distress signal was picked up and the Navy said it believed the call came from the plane. A Far East Naval Command spokesman said the plane must "be presumed to be down."

Aboard were seven Navy officers, two Marine officers and eight Navy enlisted men.

SPEED UP QUESTIONING
WASHINGTON, June 10.—Republicans launched a new plan today to speed question of Sen. Joseph R. McCarthy about his fight with the Army and to end the marathon hearings by a week from Friday at the latest.

The move came as the Wisconsin Republican took the stand to air under oath and before television cameras his explosive charges that the Army tried to thwart his hunt for Reds.

McCarthy was abruptly sworn as a witness late Wednesday after he unleashed a slashing drama-packed attack on Army Counsel Joseph N. Welch in the emotional high point of the 31-day-old hearings. McCarthy began his long awaited testimony with a general statement on the Communist menace and did not mention the Army.
